DETAILED ACTION

1. This is the second office action for serial number 10/691,340. This application contains 20 claims numbered 1-20.
2. Applicant is reminded that claims 2, 4-10 and 13-18 were withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species. However, these claims have not been listed in the claim listing with the status identifier "withdrawn". Appropriated correction is required in the next response.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 3, 11-12 and 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 1,103,839 to Rellay (of record).

As to claims 1 and 3, Rellay teaches a locking device for multiple section telescope tubes (Figs. 2 and 3) comprising a tube section (3) having an inside; a smaller tube section (2) slidably disposed within the tube section; a clamping assembly (13, 15) attached within the smaller tube section, having a locked position and a release position, the clamping assembly including a ramp block (13), fixedly attached to the smaller tube section, the ramp block having a first ramp surface (14); a release block (15) moveably disposed opposite the ramp block, having a second ramp surface (16) opposite the first ramp surface; a cylindrical roller (19, 20) rollably disposed between the first and the second ramp surfaces, wherein the roller has an eccentric cylindrical

cross-section; a release mechanism (24, 27); and a push rod (21) slidably disposed within the smaller tube.

As to claims 11-12 and 19-20, Rellay also teaches all the limitations of these these claims since these claims recited limitations similar to those recited in claims 1 and 3.

Response to Arguments

4. Applicant's arguments with respect to claims 1, 3, 11-12 and 19-20 have been considered but are moot in view of the new ground of rejection.

Conclusion

5. This action is made **NON-FINAL**
